Background

The European Investment Bank is organising a workshop to present its financing activities under the recently-launched European Fund for Strategic Investments (EFSI) and the new direct financing opportunities for Belgian businesses, in particular MidCaps and large corporates.

EFSI is a joint initiative of the EIB Group and the European Commission to help overcome the current investment gap in the EU, by mobilising private financing for strategic investments

[Feel free to forward this invitation to your colleagues or members who may be interested in attending the event.](#)
