

BOOSTING INVESTMENT IN SOCIAL INFRASTRUCTURES

The European Long-term investors' association (ELTI) is happy to invite you to a workshop on :

Boosting investment in social infrastructures

10 October 2017 / 11.15-13.00

Committee of the Regions - Van Maerlant Building – Room VM 1

99-101 rue Belliard - Brussels

High quality health, education and social housing services are as crucial as energy or digital infrastructure when it comes to building resilient and competitive territories. In February 2017, ELTI launched a dedicated high-level task force – under the aegis of the EC and with the involvement of NPBI and of the EIB – aiming to identify the needs for future investments and the financial models for social infrastructure to promote financing for this sector, something that is crucial for sustainable and inclusive growth. We will discuss how to relaunch social infrastructure financing in the EU, based on the initial findings of the High Level Task Force and with the presentation of concrete local examples of successful investments in the sector. You will find enclosed a draft agenda for the workshop.

**This event is part of the European Week of Regions and Cities (EWRC),
organised by the European Committee of the Regions.**

Online registration is open until Sept. 27th [on the EWRC website](#) (workshop code : 10A28)
